

## Int'l. Fishing and Related Activities

## § 300.114

Assistant Administrator (Attn: CCAMLR permits). A fully completed and accurate application must be submitted for each import permit requested at least 30 days before the anticipated date of the importation.

(c) *Issuance.* The Assistant Administrator may issue an import permit if the Assistant Administrator determines that the importation meets the requirements of the Act and that the resources were not or will not be harvested in violation of any conservation measure in force with respect to the United States or in violation of any regulation in this subpart. Blank import tickets will be attached to the permit. Additional blank import tickets are available from the Assistant Administrator.

(d) *Duration.* An import permit is valid from its date of issuance to its date of expiration unless it is revoked or suspended.

(e) *Transfer.* An import permit is not transferable or assignable.

(f) *Changes in information submitted by permit applicants or holders—*(1) *Changes in pending applications.* Applicants for an import permit must report in writing to the Assistant Administrator any change in the information submitted in their import permit application. The processing period for the application will be extended as necessary to review the change.

(2) *Changes occurring after permit issuance.* Any entity issued an import permit must report in writing to the Assistant Administrator any changes in previously submitted information. Any changes that would not result in a change in the importation authorized by the permit must be reported on the import ticket required to be submitted to the Assistant Administrator no later than 10 days after the date of importation. Any changes that would result in a change in the importation authorized by the permit, such as country of origin, type and quantity of the resource to be imported, and Convention statistical subarea from which the resource was harvested, must be proposed in writing to the Assistant Administrator and may not be undertaken unless authorized by the Assistant Administrator by a permit revision or new permit.

(g) *Revision, suspension, or revocation.* An import permit may be revised, suspended, or revoked based upon information subsequently reported, effective upon notification to the permit holder. An import permit may be revised, suspended, or revoked, based upon a violation of the permit, the Act, or this subpart. Failure to report a change in the information contained in an import permit application is a violation of this subpart and voids the application or permit, as applicable. Title 15 CFR part 904 governs permit sanctions under this subpart.

(h) *Disposition of resources not accompanied by required documentation.* (1) When AMLRs are imported into the United States unaccompanied by a permit authorizing import, the importer must either:

- (i) Abandon the resources;
- (ii) Waive claim to the resources; or
- (iii) Place the resources into a bonded warehouse and attempt to obtain a permit authorizing their importation.

(2) If, within 60 days of such resources being placed into a bonded warehouse, the District Director of the U.S. Customs Service receives documentation that import of the resources into the United States is authorized by a permit, the resources will be allowed entry. If documentation of a permit is not presented within 60 days, the importer's claim to the resources will be deemed waived.

(3) When resources are abandoned or claim to them waived, the resources will be delivered to the Administrator of NOAA, or a designee, for storage or disposal as authorized by law.

### **§ 300.114 Appointment of a designated representative.**

(a) All holders of permits authorizing fishing in subarea 48.3 must appoint a designated representative in the United States.

(b) The designated representative will be notified of closures under § 300.111 and must transmit this information to the vessel on the grounds.

(c) The designated representative may receive catch reports from the vessel and transmit the reports to NMFS in writing.
